DO NOT CIRCULATE

According to Soviet civilian workers, aircraft engines have been manufactured in the engine department of the Molotov Motor Vehicle Plant since February 1947.

25X1A

Comment:

- a. Only one PW report has been received on the GORKI Aircraft Engine Plant No 466, according to which the manufacture of aircraft engines was stopped shortly after the end of the war with Japan in favor of an increased production of motor vehicles. The GORKI aircraft engine department was allegedly dismantled and transferred to an unknown location.
- b. Since the aircraft engine plant represents only a small but independent department of the Molotov Automobile and Tank Plant it is considered probable that this department was converted to the production of motor vehicles.
- c. This report requires confirmation, particularly as to the rate and kind of production. It must be clarified what engine types (turbo jet engines?) were manufactured.
